

Why do I get the error message

"faircom.rtg.CtreeEnv.ct_config2(IJJ[Ljava/lang/String;)J" when using c-treeRTG?

Saved From: <http://support.veryant.com/support/phpkb/question.php?ID=194>

- c-tree version 9.5.51961 or previous: Use "ctree"
- c-tree version 9.5.53702 through 10.4.0.39110: use "ctree2"
- c-tree version 10.4.0.39701 or later: use either "ctreej" or "ctree2".

You can read more about this in Veryant's documentation, c-treeRTG for COBOL book, section "Accessing from isCOBOL".
