

How can I avoid the "java.lang.OutOfMemoryError: PermGen space" error?

This error means that the non-heap memory limit of the JVM has been reached. The non-heap memory is used to store class descriptions, so this error may appear when running huge applications.

To avoid it, you must increase the non-heap memory limit by adding `-XX:MaxPermSize=256m` Java option to the command line: `isrun -J-XX:MaxPermSize=256m PROGRAM`

or

`java -XX:MaxPermSize=256m PROGRAM`
