Several advantages are by using the IDE Report Designer to generate reports, among those: - Graphical designer integrated in our IDE (WYSWYG) - Capability to easily include graphical controls to the report - Capability to easily populate Working-Storage or File variables into the report - Capability to have a preview automatically (no code needed) - Capability to export to a PDF file (no code needed) - Capability to export to an Excel file (no code needed)   Attached you will find a tutorial about how to use the IDE Report Designer.
