Question:

I got the following compiler warning. Is there any equivalent for the COPY RESOURCE functionality?

```
--W: Directive ignored: COPY RESOURCE; file = smSWLOGON.CO, line = 1783, col
```

Answer:

The isCOBOL compiler ignores the COPY RESOURCE statement to avoid creating a .jar file for each program. We suggest putting the resource files (.bmp for example) in the same folder as the .class files. You can create a myapplication.jar file that contains all .class and resource files.

For more information see the isCOBOL 2015 R1 Documentation: isCOBOL Evolve : The Basics : isCOBOL and Java : JAR Files and the Jar Utility
