

# Where can I learn more about Classpath, the Java class loader, JDK tools and utilities?

Veryant's documentation is a good place to start.

There is a section on isCOBOL and Java in the isCOBOL Evolve documentation, under "Introduction", "The Basics".

One of the chapters is about class loading. The 2022 version of that documentation is at: [Class loading \(veryant.com\)](https://www.veryant.com/docs/2022/ClassLoading.html)

There is a good article on Wikipedia: <https://en.wikipedia.org/wiki/Classpath>

## Setting the Classpath

Solaris and Linux

<http://java.sun.com/javase/6/docs/technotes/tools/solaris/classpath.html>

Windows

<http://java.sun.com/javase/6/docs/technotes/tools/windows/classpath.html>

## How classes are found

Solaris, Linux and Windows

<http://java.sun.com/javase/6/docs/technotes/tools/findingclasses.html>

JDK Tools and Utilities

<http://java.sun.com/javase/6/docs/technotes/tools/>
