

How can I monitor a jvm started on a remote computer box?

Author: Veryant Support

Saved From: <http://support.veryant.com/support/phpkb/question.php?ID=201>

- -Dcom.sun.management.jmxremote.port=10151
- -Dcom.sun.management.jmxremote.authenticate=false
- -Dcom.sun.management.jmxremote.ssl=false
- -Djava.rmi.server.hostname=*serveripadress*

Then run the Java VisualVM tool from the client computer and create a remote connection to the server box (that tool is available from the JDK installation folder) See [Troubleshooting Java™ SE](#) regarding different Java tools that may help you troubleshoot problems you encounter with isCOBOL applications.
