How do I migrate a Vision file to an Oracle database table?

Question:

I know that one way to migrate a Vision indexed file to an Oracle database table is by writing a program that reads records from one logical file and writes them to another using the same FD and the following properties:

```
iscobol.file.index.physical_filename_1=com.iscobol.io.ScanVision
iscobol.file.index.physical_filename_2=easydb
iscobol.jdbc.driver=oracle.jdbc.OracleDriver
iscobol.jdbc.url=jdbc:oracle:thin:@machine_name:port
```

Is it possible to do this using ISMIGRATE? If so, then how do I set it up?

In the ISMIGRATE wizard, choose Acucobol Vision in the "From" field, and isCOBOL DatabaseBridge (easydb) in the "To" field. Follow the prompts in the wizard.
