Question:

The icon in the upper left corner of the Window is a green circle containing the letters "is". How can I replace this with my own icon?

In ACUCOBOL I could specify the ICON configuration variable.

Answer:

You can remove the "IS" icon on the standard window using the syntax "ICON" in the DISPLAY WINDOW statement.

Note that isCOBOL does not support the ICON syntax on independent windows due to a bug in the setIconImage() method in JDK 1.5. This bug is fixed in JDK 1.6.
